

Post-Doctoral Research Associate

The Composite Materials and Structures Laboratory (CMSL) at the Department of Mechanical, Materials, and Aerospace Engineering (MMAE) of the University of Central Florida invites applications for multiple postdoctoral research positions in the area of polymer composites. The post-doctoral research position will offer highly competitive salary and benefits.

The successful candidate is expected to have strong background in polymer chemistry, composites processing, or composites mechanics. Prior experience with nanocomposite materials would be highly desirable. The candidate should have a Ph.D. in Mechanical Engineering, Materials Science and Engineering, Polymer Science and Engineering, Chemistry, or related fields and have demonstrated strong research capability.

If interested, please send detailed resume and contact information for three references to Dr. Gou at jgou@mail.ucf.edu or call 407-823-2155.

Graduate Research Assistantship

The Composite Materials and Structures Laboratory (CMSL) at the Department of Mechanical, Materials, and Aerospace Engineering (MMAE) of the University of Central Florida invites applications for multiple graduate research assistantship positions at both Master's and PhD's levels to start in January 2009 or August 2009. Strong background in materials, manufacturing or mechanics is essential. The research assistantship will offer full tuition and competitive stipend.

If interested, please send detailed resume to Dr. Gou at jgou@mail.ucf.edu or call 407-823-2155.
